

JUNIOR RANGERS

BORN TO EXPLORE

Weedy Seadragon

These delicate, shy animals swim slowly and gracefully. Their body is covered with leaf shaped flaps that help them blend into their seagrass habitat. They are only found in southern Australian waters, and are the marine emblem for Victoria.

Colour in the Weedy Seadragon

Male Seadragons look after their eggs by carrying them under their tail. [Draw some brightly coloured eggs for this seadragon to look after.](#)
