

JUNIOR RANGERS

BORN TO EXPLORE

MICRO TRAIL

Shrink yourself down and explore plants and animals at a micro scale.

You'll need:

- Pencil
- 20cm of string
- Magnifying glass (optional)

What can you find?

Lay your string across an interesting area (this could be on the ground, along a branch or even between some rocks). Shrink yourself down to a bug-size explorer and record what you see along your trail!

Fill in this story board with pictures and words to document your adventure!
