

# JUNIOR RANGERS

## Nature Colour and Texture Investigation

### NATURE COLOUR BINGO

When you look at the environment around you, what colours do you see? Nature is full of colour thanks to a variety of native plants and animals. Explore your surroundings and see how many colours you can match. Write each item in the colour sections of the colour wheel or take photos of your matches!

Some animals in nature are full of bright colours that stand out, while others have colours that blend them into their surroundings. Can you find one of each? Note below what you find and why you believe one may stand out and the other doesn't.

**Stand out colour:** \_\_\_\_\_

**Blend in colour:** \_\_\_\_\_

Along with incredible colours, nature provides us with a range of wonderful textures. Can you find the following textures? Write down the item you find that has the following texture:

**Soft:** \_\_\_\_\_

**Hard:** \_\_\_\_\_

**Rough:** \_\_\_\_\_

**Fuzzy:** \_\_\_\_\_

**Prickly:** \_\_\_\_\_

# JUNIOR RANGERS

Draw the most interesting item you found with the colour or texture you liked best and tell us why you liked it.  
Don't forget to send it into the Junior Ranger Team at [junior.rangers@parks.vic.gov.au](mailto:junior.rangers@parks.vic.gov.au)
